WORK EXPERIENCE

London Stock Exchange Group

Software Development Engineer

Feb 2025 - Present

Bengaluru, India

- Built MANTA, an AI root-cause-analysis engine fusing 4+ signal channels over a ~1,000-node Neo4j dependency graph with 6-hop traversal, correlating up to 200 related incidents across ServiceNow, Snowflake, BigPanda, Neo4j, and Azure OpenAI to rank probable production root causes.
- Architected ORCA, an explainable change-risk engine combining deterministic CAB gates, 15 Azure OpenAI semantic channels, hybrid RAG, and calibrated ML over 6.7M+ enterprise change/incident records across 13,136 services; shipped FastAPI/Next.js with Entra RBAC and Terraform-provisioned Azure for a 146-user POC.
- Built PostgreSQL/pgvector hybrid retrieval (vector KNN + full-text + pg_trgm via reciprocal-rank fusion), improving MRR from 0.067 to 0.160 (2.4x) over vector-only on a 195-query benchmark.
- Instrumented distributed services with OpenTelemetry and built Prometheus/Grafana observability for service-level monitoring, distributed tracing, SLA tracking, and faster incident diagnosis.
- Built and scaled HackArena, an internal hackathon management platform using the PERN stack, supporting 1,000+ users across idea submission, evaluation, and winner-selection workflows.

Tech Mahindra

Software Development Intern

Oct 2023

Pune, India

- Developed the Q-Radar Jira Alert Sync Tool using React, Node.js, Express.js, and MySQL, reducing alert resolution time by 25%.

PROJECTS

AreYouLiv

Built a ClickHouse-based real-time analytics system for SonyLIV during ClickHouse Clickathon, processing ~1M playback and app-state events to measure foreground-only concurrent viewers. Reconstructed active intervals from heartbeats and state transitions, excluded paused, backgrounded, and disconnected periods, and served low-latency minute-level concurrency metrics through Python ingestion pipelines with HyperDX observability and correctness cross-checks.

Chess Royale

Developed a real-time multiplayer chess application using JavaScript, Node.js, Express.js, Socket.IO, and Chess.js, supporting synchronized online competition, legal-move handling, live game-state updates, and spectator viewing.

EDUCATION

Vellore Institute of Technology, Vellore
Bachelor of Technology, Computer Science & Engineering

2021 - 2025
CGPA: 8.54/10

Billabong High International School, Bhopal
XII (ICSE) - 92.5%
X (ICSE) - 94%

2021
2019

TECHNICAL SKILLS

Languages:	Python, Java, JavaScript, SQL
AI & Retrieval:	RAG, LangChain, MCP, semantic search, vector embeddings, chunking
Web Development:	React, Next.js, Node.js, Express.js, MERN/PERN
Cloud & DevOps:	AWS, Docker, CI/CD, infrastructure fundamentals
Observability:	OpenTelemetry, Prometheus, Grafana, HyperDX
Tools:	PowerApps, n8n, GSAP, Framer Motion
Certifications:	Microsoft Azure AI-900, Certified Kubernetes Administrator (CKA)

ADDITIONAL PURSUITS

Chairperson, Fitness and Beyond Club

Led a 28-member team delivering fitness events and partnerships, increasing participation by 130%.

Mr. University, VIT Vellore - 2023 & 2024

U19 Football Nationals, Kolkata - 2019
